Close Coupled Sensor Flush Kit (ø48mm Cistern Hole)
INST02042

FAQs

Q – Which WCs is this compatible with?
A – This is compatible with any paddle operated flush valve with a cistern lid hole from 38mm to 46mm
It is compatible with the following Instinct ranges – Espada, Keros, Kinsley and Lissett cisterns

Q – How do I activate the reduced/full flush?
A – The reduced flush is activated by waving your hand over the sensor. The full flush is activated by holding your hand over the sensor for 1 second.

Q – How much room is required around the sensor?
A – You should leave around 30cm of clear room above the sensor to provent it from being triggered when not required.

Q – How can use this product if I don't have a paddle operated flush valve?
A – A paddle operated flush valve can be retro-fitted and can purchased using the code INST02043.

Q – What type of batteries does this product take?
A – 4 x AA with an expected battery life of 12 months.

Q – Is this product supplied with batteries?
A – No.

Q – Can the toilet be flushed when the batteries run out?
A – Yes, the button still has a manual full flush option.

Q – Is there an installation video?
A – Yes, scan the QR code below.
