INSHAN170FSBBW

FAQs

Q – What Trap is recommended for use with this bathtub?

- We recommend using a shallow bath trap with this bath tub. For other bath traps a void below the floor level may be required. The trap will require a $1 \, 1/2''$ BSP connection to connect with the waste.

Q – Is this bathtub supplied with a waste?

A – No, bathtub slotted click wastes can be purchased separately from the Instinct bathroom collection in a range of finishes.

Q - What colour is the overflow trim?

A - The bathtub is supplied with a neutral overflow slot.

Q - Do I need to purchase a bath tub overflow kit for this bath tub?

A - No, the bathfub is fitted with an integrated overflow channel, the only additional purchase required is a slotted click waste.

Q - What filling methods are recommended for this bathtub

A – We recommend using a Freestanding Bath Filler/Bath Shower Mixer or a Wall Mounted Bath Filler.

Q - How heavy is this bathtub?

A – The unfilled weight is 44kg, the filled weight is 314kg. A structural engineer should be consulted to ensure that your floor is strong enough to support the weight of a filled bathtub.

Q - What material is used to make this bathtub?

- This bathtub is made from a double skin of 3.2mm acrylic, each skin is reinforced by a double layer of insulating fibreglass and resin. The bottom of the bath tub is reinforced using a 6mm thick MDF base board.

Q - Are the feet adjustable?

A – Yes, the feet are adjustable by a range of over 100mm. The feet are also installed with a ball joint to aid with levelling the bathtub.

Q - What is the overall capacity of the bathtub?

Q – What is the width of the tap deck?

A – The top of the tap deck measures 80mm, the underside is 70mm wide.
