

### Inhibited Antifreeze (Contract Chemicals) 504728

#### Specification

Bottle Colour Code	Light Blue
Bottle Dimensions	440(h) x 275(w) x 235(d) mm
Bottle Volume	25 Litre
Bottle Weight	27kg
Liquid Colour	Clear
Dosing Amount	-
Shelf Life	Minimum 3 Years

#### Features

Usage	For new central heating systems, underfloor heating, heat pumps & solar panels.
Dose Rate	Please see next page
Directions for use	Please see next page
Health & Safety	Please see next page

All information on the data sheet is correct at the time of publication. All measurements are approximate and subject to standard tolerances.

### Inhibited Antifreeze (Contract Chemicals) 504728

#### Features

##### Dose Rate

- Minimum dose rate to achieve the NSF CIAS performance standard is 25 litre per 100 litre (25%) system capacity. (approximately 10 radiators).
- Additional antifreeze may be added to reduce the system's freezing point (see table above).
- Preferentially the product should be diluted with demineralised, softened water or 'mains' (naturally soft or hard) water.
- Overdosing is preferable to underdosing. **Note:** After installation it will no longer be possible to use pipe-freezing equipment on the system.

##### Mixing Guide

Dose Rate %	Freeze Point		Burst Point	
	°C	°F	°C	°F
25	-11	12	-15	5
30	-15	5	-20	-4
35	-18	0	-24	-11
40	-22	-8	-30	-22

##### Directions for use

- Add this treatment via the filling loop, a drained radiator, powered flushing machine or through the Feed & Expansion tank.
- After treatment engage the circulation pump for 1-2 hours to distribute evenly. Bleed radiators to remove any trapped air.
- After treatment, record date of treatment in the boiler logbook.
- It is recommended that systems filled with antifreeze are drained and refilled every 5 years to maintain effective protection.

##### Health & Safety

Keep out of reach of children. Dispose of contents & container in accordance with national regulations. Safety Data Sheet available upon request.

**Do not use with PRIMATIC single feed cylinders.**
