Monument SweatBOX®

MONUMENT TOOLS

MADE IN BRITAIN

The SweatBOX® is the ultimate plumbers soldering tray. The Sweatbox features a **flame retardant engineering grade plastic** with a **patented clamp** for holding different sizing of copper pipe up to 22mm or 3/4in.. There is a **silicone strip edge** to the Sweatbox ensuring heat is not conducted from the hot copper pipe to the plastic of the Sweatbox or the clients property. Adhesive **rubber feet** are included, helping to prevent scratches to surfaces. The sealed compartments are ideal for holding a gas bottle, separated blowtorch and all the essentials needed for soldering or sweating a joint. There's even a compartment for flux brushes.

I got this Sweatbox free through the Monument Masters and it is very robust compared to other alternatives and very simple to use. The holders for the blow lamp and flux brushes are very useful.

I think it is really durable, well constructed and very versatile. I've used it with soldering kit and also my press gun for quick movement on the job with all the gear I needed in hand rather than carrying a couple of boxes. The compartments are well sized and I like the flux brush / pen holder. The clip in the centre had me thinking best use for either bit of a note pad or wet rag. Monument are always spot on with their tools and equipment!

I've found this sweatbox really durable and the quality is second to none, very robust. It's even been dropped a few times accidentally with no damage. It is well laid out with some extra features like somewhere to store your blow lamp. As a gas engineer we have all been there fitting a gas hob balancing 15mm copper pipe with half inch male iron brass fitting on brand new fitted kitchen cabinet ready to be soldered. This sweatbox has two key features one is somewhere to store the blow lamp after using it with a hot tip and the second is somewhere to hold the 22 and 15mm copper pipe while soldering. The price is also very competitive.

Johnstone Plumbing and Heating

25 February 2021 @ 11:50

Solid construction, no issues as of yet with wear and tear. It does exactly what it is made for, a good sweatbox with innovative design features - the pipe clamp in particular is great. Decently priced against similar products on the market.

25 February 2021 @ 11:33

Good solid box, a lot better than others I've tried in the past. It's just brilliant, holds everything I need for soldering, even a flux brush holder. No more bodging pipes together to solder them and the clips to hold the pipe are a game changer. Definitely worth the money.

The material used is of high durability, light but hard wearing. Perfect storage compartments for necessary tools and fittings required for the job. As a small business we now want to order one for all our workforce.

19 February 2021 @ 11:22

I've been using the sweatbox now for around 12 months. I use it as an install box so it carries the hand tools I need and all my soldering tools too. The clamp with the rubber heat stops help keep pipes held in place while you sweat them up. It has plenty of storage compartments to fit everything in and the bottle holder and flux brush holder are a good idea too. The pipe clamp and silicone burn protectors are spot on. Good value for money and will help you to be more productive.

Thick sturdy construction with a bit of weight behind it. Gives you the confidence that it's a quality made product, not flimsy at all. Every preformed pocket/hole is instantly recognisable for what goes into them from the blow torch pocket to the flux brush hole. Love the copper tube clamps built into the middle, very handy when you need the extra pair of hands whilst pre soldering pieces before attaching to the rest of your pipework. The curved base inside each pocket is great as you know you won't get any muck lurking there that you can't quite clean. Also feels well balanced when loaded with everything where it's meant to be. Been through many sweat boxes and bags that just ended up being clutter boxes or mucky and you have to throw them away. This sweatbox has been designed to be sturdy, easily cleaned and made for the job. It will last a lot longer than any I've had before.

This box is an answer to carrying a gas bottle, solder, flux fitting brushes, in fact all the dirty stuff in one container which saves messing up clean tools and keeps off the floor. The clamps for holding pipes is particularly useful for soldering, instead of having to search for something to support the pipes while sweating together. The sweatbox is very solid and should last years if its not abused too much. Good size, strong and easily carried. Only thing is I may have added a pipe rest along the handle as well. Overall it ticks a lot of boxes that others do not especially the gas bottle pocket.

My first impressions are that it is very well made and robust. You put your solder gear in and away you go, couldn't be easier. Has a nice slot that your gas bottle sits in nice and snug. Also has a clip that can hold your pipe while you solder and plenty of room for soldering accessories, pipe cutter etc. Great value for money.

Great piece of kit, strong sturdy construction. Made for the job with dedicated bottle and flux brush compartments. Love the sweat clamp especially when used in conjunction with the Dimple Press (Monument KAINN solder fitting crimp pliers). Plenty of room for cutters, crimps, bottles, torch, fittings and more. Don't do hot works? That's ok you can adapt the box to fit your press gun, cans of coke, pens etc.

RJM Multi Trade Ltd T/A Bog Standard Plumbing

22 February 2021 @ 10:02

Strong build quality. Doesn't burn with heat, keeps your blow lamp from combustible flooring. Only bit to improve for me is the flux holding point to keep brush clean. The pipe holding clamp has come out a few times but can be remounted allowing it to be replaced if it was damaged. Very straightforward to use and very practical. Safe and well designed tote for any heating work, which will protect you and the customer's property whilst doing hot works.
